Looking for help with the data science, machine learning, artificial intelligence, or computing part of your research?

An I-DISC Fellow can help! I-DISC Fellows are advanced doctoral students with expertise in data science, computation, optimization, and/or machine learning.

What you get:
Time from a computer science doctoral student, up to 4 weeks @ 20 hours/week effort. No need to advertise or interview candidates.

The cost:
NONE for Summer 2021. (Fees may be charged to cover the Fellow’s time in future semesters.)

How to apply:
Interested faculty should complete a REQUEST FORM, available on the I-DISC Fellows webpage, and provide a brief summary of project, time needed and scheduling constraints.

About I-DISC
Lehigh’s Institute for Data, Intelligent Systems, and Computation is focused on building, supporting, and growing research collaborations across the university and with industrial, academic, and governmental partners to attack some of the most pressing problems in technology and society.
